

# Your weekly self review

For Bruce. Matstrumpor only. Read time 3 minutes. Do it every Monday, 30 minutes.

## When and where

---

Every Monday at 15:00 Manila time.

The system updates the Growth Guide in the Swedish morning, so by Monday afternoon it is fresh.

Open two pages in Notion:

- **Growth Guide:** <https://www.notion.so/3ed270ab908c811a9effeddb5f5e2de>
- **Matstrumpor creative hub** (your briefs and rows):  
<https://www.notion.so/3a7270ab908c80d29f35e73e51e457ff>

Cannot open one of them? Tell Axel.

Your ads are the rows in the creative hub where you are Ansvarig. Search the Growth Guide for the same ad name. The first Monday, set **Ägare** to you on every ad that is yours. After that, filter the Guide on Ägare = you and you see only your ads.

## The six steps

---

Take the rows that got a new **Etikett** since last Monday. Biggest **Spend kr** first.

1. **Did you do last week's Nästa steg?** Write yes or no in Anteckning on that row.
2. **Is there enough data?** The minimum is 300 kr spent AND 3 purchases (Köp). Under the minimum nothing is judged, whatever the label says. Write Beslut = Vänta and move on.
3. **Did the video come out as the brief said?** Same hook line, same order, same timing? If not, the cut failed, not the idea. Write "As briefed" or what differed in Anteckning.
4. **Where did people leave?** Compare Hook rate and Hold rate with the biggest ad in the Guide. Lower hook: write "hook". Lower hold: write "hold". Both fine but few purchases: write "after the click". A hook rate of 90 percent or more is a wrong number, skip it.
5. **Why? What would you do differently?** One or two lines in Anteckning, starting with "Guess:". Then Beslut: any winner label = Iterera. Loser = Släpp, unless you can say in one line what you would change, then Iterera once. Skala means more money and only Axel decides that, so write it only as your recommendation.
6. **Hit rate and one test.** Count your labelled ads. Winners = BREAKTHROUGH or SPEND\_WINNER. Write it as a fraction, never a percent: "2 of 15, 2 of 9 delivered" (the second number leaves out INGEN\_LEVERANS). Then pick ONE test for next week and write it in Nästa steg on the row it builds on. Build on a winner if you have one. Nothing working: a new angle, not a copy.

Needs new filming? Write "NEW FOOTAGE" in Nästa steg and stop. Never cut it from old clips and never create a hub row for it. Axel orders the filming, and the row comes when the raw clips are in Drive.

The store's name never appears in an ad.

## The words in the Guide

---

- **Etikett** = the label. The system sets it after the ad's own first week. It can go up in week 2 and 3, never down. You only read it.
- BREAKTHROUGH = took a big share of the campaign and made money. SPEND\_WINNER = took a big share but did not make money. KPI\_WINNER = small share, but at least one purchase at a good price. LOSER = was shown, none of the above. INGEN\_LEVERANS = never really shown, says nothing about the idea.
- **Spend kr, Köp, Hook rate, Hold rate** = the last 14 days up to the date in **Mätt**.
- **Vinstbidrag 14 d kr** = profit after ad cost. Below zero means the ad loses money.

- **Anteckning** = your note. **Beslut** = your decision (Skala, Iterera, Vänta, Släpp). **Nästa steg** = next week's one thing. **Ägare** = you.

Axel reads what you write. The system rewrites the measured columns every few days but never touches your four. The money numbers stay between you and Axel.
