

Your weekly self review

For Bruce, Matstrumpor only. Every Monday 15:00 Manila, 30 minutes. Read time 3 minutes.

Where

Open two pages in Notion:

- **Growth Guide:** <https://www.notion.so/3ed270ab908c811a9efffeddb5f5e2de>
- **Matstrumpor creative hub** (your briefs and rows):
<https://www.notion.so/3a7270ab908c80d29f35e73e51e457ff>

Cannot open one of them? Tell Axel.

Your ads are the hub rows where you are Ansvarig. The Guide has a row with the same ad name. The first Monday, set **Ägare** = you on those rows. After that, filter the Guide on Ägare = you.

The six steps

Take your rows with an **Etikett** but no **Beslut**, and rows with a new **Etikett v2** or **v3**. Biggest **Spend kr** first.

1. **Did you do last week's Nästa steg?** Write yes or no in Anteckning on that row.
2. **Is there enough data?** The minimum is 300 kr spent AND 3 purchases (Köp). Under it: Beslut = Vänta (wait) and move on.
3. **Did the video come out as the brief said?** Same hook line, same order, same timing? If not, the cut failed, not the idea. In Anteckning write "As briefed" or what differed.
4. **Where did people leave?** Compare Hook rate and Hold rate with the biggest ad in the Guide. In Anteckning write "hook", "hold", or "after the click" when both are fine but few buy. A hook rate of 90 percent or more is a wrong number, skip it.
5. **Why? What would you do differently?** One or two lines in Anteckning, starting with "Guess:". Then Beslut: BREAKTHROUGH or SPEND_WINNER = Iterera. KPI_WINNER or LOSER = Släpp. Exception: Typ is not IMIT and one line says what you would change, then Iterera once. Skala is Axel's call, write it only as your recommendation.
6. **Hit rate and one test.** Count your labelled ads. Winners = BREAKTHROUGH or SPEND_WINNER. Write a fraction, never a percent: "2 of 15, 2 of 9 delivered" (the second number leaves out INGEN_LEVERANS). Then pick ONE test for next week and write it in Nästa steg on the row it builds on. Build on a winner if you have one. Nothing working: a new angle, not a copy.

Needs new filming? Write "NEW FOOTAGE" in Nästa steg and stop. No cut from old clips, no hub row. Axel orders the filming, and the row comes when the raw clips are in Drive.

The store's name never appears in an ad.

The words in the Guide

- **Etikett** = the label. The system sets it after the ad's own first week. It can go up in week 2 and 3, never down. You only read it.
- BREAKTHROUGH = big share of the campaign, the campaign grew, made money. SPEND_WINNER = big share, but one of those is missing. KPI_WINNER = small share, 1 or more purchases, as efficient as the campaign or better. LOSER = was shown, none of the above. INGEN_LEVERANS = never really shown, says nothing about the idea.
- **Spend kr, Köp, Hook rate, Hold rate** = the last 14 days up to the date in **Mätt. Vinstbidrag 14 d kr** = profit after ad cost, below zero loses money. **Typ** = IDEA new idea, ITER new version, IMIT copy of another brand's ad.
- **Anteckning** = your note. **Beslut** = Skala (scale), Iterera (iterate), Vänta (wait), Släpp (drop). **Nästa steg** = next week's one thing. **Ägare** = you.

Axel reads your four columns. The system never touches them. The money numbers stay between you and Axel.
