Go to the table **Ad Roadmap**. Cannot open it? Tell Axel.

Rows with a RESULTS and STATUS not Done

1. Under 300 kr spent or under 3 purchases? Write "Too little data" in **LEARNINGS** and set **STATUS = Done**. Next row.
2. Did the video come out as the brief said? If not, write what differed.
3. Hook rate or Hold rate lower than the best batch in the table? Write "hook" or "hold". Ignore a hook rate of 90 percent or more.
4. One line on why, starting with "Guess:".

Write 2 to 4 in **LEARNINGS**, under any text already there. Set **STATUS = Done**.

Then add ONE row

Next week's test, before it is briefed. Fill in: **AD CONCEPT**, **BREAKTHROUGH MEMO** (WHY we make it, WHAT it is about, HOW we make it), **DESIRE/CORE AVATAR**, **SUB AVATAR**, **ANGLE(S)**, **AWARENESS LEVEL**, **AD TYPE**, **STATUS = Working**. Then brief it in the hub as usual. The system fills the rest.

Build on a 🏆 or 📁 row if you have one. Nothing working: a new angle, not a copy.

New filming needed? **STATUS = Filming** and stop. No hub row until the raw clips are in Drive.

The hit rate is at the top of the page. The store's name never appears in an ad. Skala is Axel's call.
